

Project Proposal Components

- **Title**
 - Should be well defined, indicate the project aim and immediate solution that it is going to provide.
- **Scope**
 - Defines the domain of the project. List any previous tools or work done in the same area. Also identify the level to which the project is going to be probed into in future. Mention what the project covers and what it does not cover.
- **Objective**
 - Outline the major aims/goals that are aimed to be achieved through the project.
- **Problem Statement and Description**
 - Explain the major reason for choosing the project and the problem addressed by the project. Describe the problem in detail (e.g., office automation mitigates manual work etc.)
 - Should not be more than 2-3 paragraphs.
- **Languages and Tools**
 - List down the languages and tools you are going to use

Instructions:

- Maximum **5 group members** are allowed.
- You can only use **OOP languages** for the project.
- Clearly mention the **Name** and **Roll No.** of all group members.
- Only **one submission per group** is required on **Google Classroom**.
- Name your submission file in the following format (**ProjectName-Deliverable 1**) e.g., **Netflix-Deliverable 1**. Similarly, for the next deliverable you will name it Netflix-Deliverable 2.
